HACKinDAY

SAMPLE EVENT REPORT

Event Category	Technical	**Organizer**	Beta Club
Date	6 November 2026	**Time**	11:00 AM – 1:00 PM
Venue	LGL05	**Format**	24/7 Hackathon (as listed)

Document status: Sample/template for demonstration. This is not an official post-event report. Replace illustrative sections with verified event details after the event takes place.

1. Event Overview

HACKinDAY is listed as a technical hackathon organized by Beta Club. The event listing describes its theme as a 24/7 hackathon and highlights topics including AI, cybersecurity, Python, TensorFlow, Java, and Git & GitHub. The event is scheduled for 6 November 2026 from 11:00 AM to 1:00 PM at venue LGL05.

2. Objectives

The following are proposed objectives for this sample report and should be confirmed by the event organizers:

- Encourage participants to develop practical solutions to technical problems.
- Promote teamwork, rapid prototyping, and collaborative problem-solving.
- Provide hands-on exposure to AI, cybersecurity, programming, and development tools.
- Encourage participants to document their work and present a working prototype.

3. Topics and Skills

The event listing includes AI, CYBER, PYTHON, TensorFlow, Java, and Git & GitHub. These topics can be used as suggested areas for project development, technical discussion, or demonstrations.

4. Resource Person

Name	Priya Sharma
Designation	Senior AI Research Scientist
Organization	Google
Profile	LinkedIn profile listed on the event page

Note: Resource-person details are taken from the event listing supplied. Confirm participation and affiliation before publishing an official report.

5. Proposed Event Flow

Time	Activity (proposed)
11:00–11:10 AM	Welcome, registration, and event briefing

Time	Activity (proposed)
11:10–11:20 AM	Theme, rules, and challenge explanation
11:20 AM–12:30 PM	Team planning, prototyping, and development
12:30–12:50 PM	Project demonstrations and judging (if applicable)
12:50–1:00 PM	Closing remarks and acknowledgements

6. Participation and Outcomes

To be completed after the event. Record the number of participants and teams, projects submitted, demonstrations completed, awards or recognitions, and feedback collected. Do not enter estimated figures as actual results.

Participants: _____ **Teams:** _____ **Projects presented:** _____

7. Feedback and Key Learnings

To be completed using participant feedback and organizer observations. Suggested points include technical learning, collaboration, time management, prototype quality, and improvements for future events.

8. Conclusion

HACKinDAY is presented in the event listing as a technical hackathon focused on modern development and computing skills. After the event, summarize what was conducted, the outcomes achieved, participant feedback, and recommendations for future editions.

9. Evidence and Attachments

Attach the final agenda, approved photographs, participant or team list where appropriate, project summaries, judging results (if applicable), feedback summary, and supporting documents. Ensure all included material is authorized for sharing.
